

Equal opportunities statement

This Association believes that any form of discrimination, either direct or indirect is wrong.

The harassment of any person/persons on the grounds of race, ethnic origin, sex, marital status, disability, illness, age, dependants, class, religious beliefs, sexual orientation, political persuasion or financial situation will not be tolerated.

We believe that such discrimination is counter productive and harmful, not only to the Association, but to the community in general.

We will actively seek to involve all tenants/residents and appropriate Association staff in the decision making process regarding issues covered by the Association, ensuring that no individual person/persons are looked upon or treated less favorably than any other, on any of the grounds previously mentioned.

The Association will at all times operate within and actively promote its Equal Opportunities Policy.

Where discrimination is reported to the Association, whether real or implied, the Association will use its resources to co-operate with the landlord organisation in any investigation deemed necessary, and support the landlord organisation in any reasonable action to remedy the situation.

We believe that statement together with the Equal Opportunities Policy demonstrates the Association's commitment to equal opportunities and anti discrimination.
